

SUMMARY

- AI Engineer with experience in backend development, Generative AI systems, and cloud-native deployments. Skilled in Python, Flask, FastAPI, Azure, system design, CI/CD, and secure API engineering. Strong ability to build scalable production-grade solutions and collaborate with cross-functional teams.

EXPERIENCE

- **EY GDS** Noida, India
Analyst Aug 2023 – Present
 - **Backend Microservices Development:** End to End Development and Development of scalable backend services using Python, Flask, and FastAPI hosted on Microsoft Azure.
 - **Generative AI Integrations:** Built REST APIs integrated with OpenAI GPT for automated summarization, intelligent document verification, and query processing.
 - **Engineering Leadership:** Mentored junior developers, performed code reviews, and enforced secure coding standards.
 - **CI/CD Automation:** Implemented GitHub Actions pipelines improving deployment and testing efficiency.
 - **Cross-functional Collaboration:** Worked with product, data, and QA teams to define architecture and deliver production releases.
- **Chegg India** Remote
Subject Matter Expert Nov 2021 – Jul 2023
 - **Problem Solving:** Provided high-quality solutions for advanced mathematics and calculus with clear explanations.

EXPERIENCE/PROJECTS

- **End-to-End Generative AI Application** EY GDS
GEN-AI Applications 2024 – Present
 - **RAG-based Conversational AI:** Architected a Retrieval-Augmented Generation (RAG) conversational AI system leveraging GPT (OpenAI), Azure Cognitive Search, and embeddings for intelligent document retrieval and Q&A over business data.
 - **Advanced Retrieval Techniques:** Implemented contextual compression, multi-index merging, and priority-based chunk retrieval (CLIPPER-style) to optimize context-aware responses.
 - **Automated Document Pipeline:** Developed an automated document processing pipeline with LangChain handling multi-format ingestion, semantic chunking, vector indexing, and large-file summarization.
 - **Insights & Theming:** Built theme extraction and strategic insights generation for M&A analysis, sector trend detection, and business intelligence reporting.
 - **Production Deployment & Monitoring:** Deployed a production-ready AI solution with streaming responses, token management, and integrated Azure Application Insights for performance monitoring.
- **Automated Information Extraction System** Independent Project
Python Automation / NLP
 - **PDF Parsing Engine:** Built extraction pipeline using PyMuPDF, pdfplumber, and SpaCy.
 - **NER + Regex Automation:** Captured product names, specs, vendor details using NLP and rule-based methods.
 - **UI + Reporting:** Developed Tkinter batch-processing dashboard with Excel export using pandas and openpyxl.

EDUCATION

- **Kalinga Institute of Industrial Technology** Bhubaneswar, India
B.Tech in Information Technology; CGPA: 8.68 2019 – 2023
- **Sushant Public School** Gurugram, India
Intermediate (PCM) – 77% 2016 – 2018
- **St. Karen's High School** Patna, India
Matriculation – CGPA: 8.4 2015 – 2016

SKILLS

- **Programming:** Python, SQL , C/C++
- **Frameworks:** Flask, FastAPI, LangChain
- **Databases:** MySQL, Azure SQL
- **Cloud/DevOps:** Azure(Web App,Storage,Function App) GitHub Actions, CI/CD
- **AI/ML:** OpenAI API, Generative AI, RAG, LLM Pipelines, Embeddings
