

SUMMARY

AI Engineer with hands-on experience in designing, developing, and deploying production-grade Generative AI solutions and Proof-of-Concepts (PoCs). Strong background in backend development using Python, Flask, and FastAPI, with expertise in LLM integrations, RAG pipelines, prompt engineering, and document intelligence. Experienced in cloud-native deployments on Microsoft Azure, CI/CD automation, and building scalable, secure APIs in cross-functional enterprise environments.

SKILLS

- Programming Languages:** Python, SQL
- Backend & APIs:** Flask, FastAPI
- Generative AI & LLMs:** OpenAI API, Google Gemini, LangChain, Prompt Engineering, RAG, Embeddings
- NLP & Document AI:** PDF Parsing (PyPDF2, PyMuPDF, pdfplumber), Regex, SpaCy
- Databases & Vector Stores:** Azure SQL, Vector Indexing, Semantic Search
- Cloud & DevOps:** Azure Web Apps, Azure Functions, Azure Storage, Azure APIM, Azure Key Vault, GitHub Actions, CI/CD Pipelines
- UI & Reporting:** Streamlit, Tkinter, ThinkCell, Excel/PowerPoint Automation

EXPERIENCE

EY GDS

Analyst

Backend & AI Application Development: Designed and developed scalable backend services and AI-powered applications using Python, Flask, and FastAPI, deployed on Microsoft Azure.

Generative AI Integrations: Built REST APIs integrated with OpenAI GPT and enterprise AI workflows for document verification, summarization, intelligent query processing, and business automation use cases.

Release Engineering & Production Delivery: Managed end-to-end release activities including CI/CD pipeline support, pre-production validation, security scan approvals, deployment readiness, and production release coordination for enterprise applications.

Cross-functional Stakeholder Collaboration: Worked closely with product, QA, UAT, and InfoSec teams to incorporate testing feedback, address compliance and security requirements, and ensure smooth delivery of production-ready solutions.

Engineering Practices: Performed code reviews, mentored junior developers, and followed secure coding and quality engineering practices across the development lifecycle.

Noida, India

Aug 2023 – Present

Chegg India

Subject Matter Expert

Problem Solving: Provided high-quality solutions for advanced mathematics and calculus with clear explanations.

Remote (Tutor)

Nov 2021 – Jul 2023

KEY PROJECTS

AI-Automated Business Reporting

Python, Azure Functions, OpenAI, LangChain, SQL, ThinkCell

Data Normalization & Matching: Built an AI-assisted analytics solution for workforce and spend datasets with taxonomy mapping, normalization, and vector-based similarity matching.

Savings Analysis: Developed workflows to identify optimization opportunities and generate structured cost-saving insights from mapped enterprise datasets for business stakeholders.

Automated Reporting: Implemented Excel and PowerPoint report-generation pipelines with ThinkCell-based visualizations for executive-ready business reporting.

EY GDS

2025-26

AI-Powered Resume Matcher Application

Independent Project

Generative AI, Prompt Engineering, Streamlit

2025

Resume Intelligence Engine: Designed and developed an AI-powered web application to analyze resumes against job descriptions using Google Gemini LLMs, generating match scores, missing keywords, and ATS-friendly improvement recommendations.

Document Validation & Parsing: Implemented secure resume upload handling with MIME-type validation, PDF/TXT text extraction using PyPDF2, and LLM-based classification to detect and reject non-resume documents automatically.

Prompt Engineering & Evaluation: Engineered structured prompts to ensure consistent, deterministic analysis outputs in Markdown with scoring, keyword gap analysis, and actionable bullet-point rewrites.

Financial Intelligence & Research Assistant Platform

EY GDS

Python, OpenAI, LangChain, Azure AI

2024 - 25

EDGAR Q&A Platform: Developed Retrieval-Augmented Generation (RAG) capabilities over SEC filings enabling semantic search, contextual retrieval, and question answering using OpenAI, LangChain, and Azure Cognitive Search.

Capital IQ (CapIQ) Integration: Built backend APIs and data retrieval services integrating S&P Capital IQ financial datasets to provide company financials, market intelligence, and investment research insights.

Diffbot Intelligence Service: Developed and maintained APIs leveraging Diffbot for company intelligence, entity extraction, knowledge graph enrichment, and automated information retrieval workflows.

Financial Research Assistant: Implemented conversational AI capabilities aggregating information from multiple enterprise and external sources including EDGAR, CapIQ, and Diffbot through a unified chatbot experience.

Automated Information Extraction System

EY GDS

Python Automation / NLP

2024

PDF Parsing Engine: Built an extraction pipeline using PyMuPDF, pdfplumber, and SpaCy for processing semi-structured PDF documents.

NER + Regex Automation: Captured product names, specifications, and vendor details using a combination of NLP and rule-based extraction methods.

UI + Reporting: Developed a Tkinter-based batch-processing dashboard with Excel export capabilities using pandas and openpyxl.

Proof of Concepts (PoCs)

EY GDS

Research & Innovation

RAGAS Evaluation Framework: Conducted proof-of-concept implementation of RAGAS to evaluate Retrieval-Augmented Generation (RAG) pipelines using metrics such as Faithfulness, Answer Relevancy, Context Precision, and Context Recall for assessing LLM response quality.

PDF Table Extraction Automation: Developed a proof-of-concept solution for extracting structured tabular data from PDF documents and automatically generating Excel outputs using Python-based parsing and data transformation workflows.

EDUCATION

Kalinga Institute of Industrial Technology

Bhubaneswar, India

B.Tech in Information Technology; CGPA: 8.68

2019 – 2023

Sushant Public School

Patna, India

Intermediate (PCM) – 77%

2016 – 2018

St. Karen's High School

Patna, India

Matriculation – CGPA: 8.4

2015 – 2016
